

ELITE DECOR CONSTRUCTIONS

Elite Decor Facades

provides services in assembling transparent structures, manufacturing fasteners for decorative elements, producing insulated glass units, facade decorative elements from sheet materials, PVC window systems, as well as custom structures made from black metal and stainless steel.

**COMPREHENSIVE TECHNOLOGICAL SOLUTIONS
IN FACADES AND GLAZING**

MANUFACTURING AND PRODUCTS

PRODUCTION OF TRANSPARENT STRUCTURES

The company manufactures aluminum window and door structures that combine high-quality profiles and components with enhanced technical characteristics at an optimal price. We use systems from renowned manufacturers, such as KMD and ALUPRO, to produce these structures. Our office partition systems provide different options for dividing rooms, offering an elegant style and ensuring comfortable working conditions for employees. Our railing systems allow you to create durable, reliable, and stylish all-glass railings in a variety of options. With any profile color (according to the RAL scale) and type of glass, you can implement various design projects, regardless of style or complexity.

PRODUCTION OF DECORATIVE ELEMENT MOUNTING SYSTEMS

The fastening systems for ventilated curtain walls from KMD and ALUPRO have proven themselves to be reliable substructures for ventilated curtain walls, which are in high demand in modern construction projects.

All elements of the systems were developed by the engineering departments of the companies and have received high ratings on the Ukrainian market.

MANUFACTURE OF FACADE DECORATIVE ELEMENTS FROM SHEET MATERIALS

The range of elements manufactured at our production facility includes: sheet metal, ACP, and HPL cassettes painted in any color (according to the RAL scale), facade flashings, slopes, horizontal belts, internal and external facade joints, sandwich panels, facade fillings, air conditioner screen grilles, ventilation grilles, etc.

PRODUCTION OF PVC WINDOW AND DOOR SYSTEMS

Our company manufactures metal-plastic windows and doors, as well as sliding systems (sliding windows). In the production of our products, we use high-quality profile systems. PVC structures are manufactured on modern German equipment from high-quality raw materials supplied from Europe and the USA. We also provide profile lamination and arch bending services for individual orders. Our products meet the standards of strength, sound and heat insulation. We provide warranty and post-warranty service.

PRODUCTION OF CUSTOM STRUCTURES FROM BLACK METAL AND STAINLESS STEEL

We specialize in manufacturing a wide range of structural elements from black metal and stainless steel, including:

- Bases and supporting frameworks for transparent glass systems
- Cantilever brackets
- Columns and trusses
- Balustrades
- Handrails and guardrails
- Entrance groups
- Canopies and awnings
- Pedestrian bridges and stair flights
- Mounting systems
- Bus stop shelters and transport hubs

OUR BENEFITS

UNINTERRUPTED PRODUCTION

We ensure stable and continuous production processes thanks to our on-site generators with a total capacity of 1.7 MW. This significantly reduces the risk of product defects caused by power outages and allows us to guarantee on-time delivery of our clients' orders — exactly as agreed.

HIGH-PRECISION CNC EQUIPMENT

Using high-precision CNC equipment, we are able to manufacture and process metal parts with precision and accuracy.

FLEXIBLE AND EFFICIENT LOGISTICS

We customize our logistics solutions to meet each client's specific needs. This includes route planning, packaging methods, and delivery scheduling — all aimed at minimizing the risk of damage and ensuring timely delivery. Our location enables us to efficiently ship across all regions of Ukraine.

DISCOUNTS FOR LOYAL CLIENTS

We greatly value our long-term clients and show our appreciation through a structured system of discounts and exclusive offers.

The more frequently you order from us, the greater the discount — our way of saying thank you for your trust and loyalty, while still delivering top-tier quality and service.

WARRANTY AND POST-WARRANTY SERVICE

We provide comprehensive warranty and post-warranty support. We understand the importance of reliability and longevity, so we offer full coverage for manufacturing defects, including free repairs or product replacement.

Our specialists are always available to assist with maintenance, repairs or upgrades, ensuring long-term performance of your insulated glass units.

QUALITY CONTROL

Our products undergo multistep quality control in accordance with state standards and laboratory testing (DSTU regulations).

Each stage of production is thoroughly inspected to meet the highest benchmarks. We use cutting-edge technology to detect any deviation, and our specialists undergo regular training to maintain consistently high product quality.
